QUICK FACTS ABOUT CTI & OUR PRODUCTS

Who We Are

Located in Barrington, Illinois, CTI has been manufacturing the highest quality foil balloons available for 50 years. We are continuously working to remain on the cutting edge of design, technology and innovation. At CTI, customer satisfaction is our top priority. Our customer service representatives are available to assist you in placing orders, custom requests and any other needs which you may have.

CTI cares about our environment and does its part to make sure that everything we manufacture has a positive effect on our atmosphere. Latex is a natural resource produced from Rubber Trees and our latex balloons are 100% biodegradable. We also use water-based inks on all of our printed balloons, which are completely child safe and will not harm the Earth's ozone.

We have taken advantage of advances in film technology and are dedicated to making sure we provide you with the finest and longest lasting balloons on the market. We are proud to say that our balloons will not burst easily and can handle hot and cold far better than our competition. CTI's foil balloons are self-sealing, and with the easy-fill valve, inflation is simple and they will float longer than any other brand. Do you need a balloon for an elevation up to 7500 feet? CTI has 17" round and heart shapes that are up to the high flying task.

Balloon Inflation Tips

All of CTI's 17" and larger foil balloons have a self-sealing valve and do not require the use of a heat sealer. Please use only the long, narrow metal top for inflation of foil balloons, the rubber top is for the inflation of latex balloons only and can cause damage to foil balloons. Tie ribbon below inflation opening located on the stem of the balloon.

Most 14" and smaller foil balloons (ordered flat) are not self sealing and do require the use of an air inflater and a heat sealer. These must be used with balloon cups and sticks. Do not dispense helium into foil balloons smaller than 17 inch.

Packaging & Product Codes

Foil balloons come in different sizes and packages. When ordering, please refer to your current price list.

For 17" balloons, Ultraloons™ and Miniloons™, price is based upon non-license and license, and the form of packaging.

For Shape-A-Loons, the price is based upon the category listed below the item number and the form of packaging.

Single-wide packaging is available; please see example below.

- H- 5-Pack, seasonal & stars
- C- 5-Pack, card
- BHP- Premium single packaged
- V- Bulk/flat, air-filled with valve
- HV- Bulk
- P – Single Pack
- RPA – Single Pack W/Ribbon
- RPX – Single Pack W/Ribbon
- HP – Single Pack

Important Note: Product, prices and availability are subject to change without notice. Actual balloon designs may vary. Helium filled balloons will expand and contract when exposed to hot and cold temperatures. They will automatically adjust back to their original buoyancy at room temperature. For environmental purposes please never tie metallic ribbon to the balloons.

Balloon Inflation Guide

- ✓ Helium can be used to fill both latex and foil balloons to make them float.
- ✓ Latex balloons must use the blunt nozzle that is made especially for latex material.
- ✓ It is important to use the correct nozzle when filling different types of balloons.
- ✓ The pointed nozzle on the regulator can be used with both foil and clear film balloons.

Balloon Inflation Guide

What is the best way to inflate a balloon?

At the neck of the balloon, you can find arrows indicating the opening of CTI's easy-fill valves.

Simply insert the helium nozzle beneath the arrows on the valve opening, hold the balloon straight, and push the nozzle down to inflate the balloon slowly.

When the balloon is fully inflated, the helium flow will automatically stop. Once the nozzle is removed from the balloon valve, the valve will automatically seal.

Ribbon Attachment Guide

What is the proper way to secure ribbon to a balloon?

✓ Correct way to tie ribbon to the balloon

✓ Correct way to secure the ribbon with adhesive

It is important to secure balloons with a ribbon and weight to ensure they do not float away. There are two ways you can attach a ribbon to a balloon: you can tie the ribbon on at the bottom of the neck of the balloon (where the neck is indented) or you can use a strong adhesive tape to secure the ribbon.

This is the incorrect way to tie the ribbon to the balloon. The ribbon should be secured lower on the indented section of the neck to avoid damage to the balloon valve.

Never tie the ribbon on higher than the indented portion of the balloon neck. Tying the ribbon higher may result in damage to the balloon valve which could allow helium to escape the balloon.
