Want to create something **over the top**? There are balloon decorators all over the country eager to help you make those moments special – just search online to find a professional near you!

DO NOT LIGHT TREE

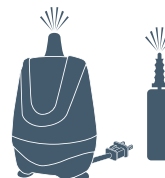

- (1) Fill balloons with air (NOT helium) using either an air inflator or a hand pump.
- (2) Take two mismatched balloons and twist the two together using white twist ties.
- (3) Take the pair that you twist tied and twist tie them onto the branches of the tree (Start at the bottom of the tree and work around, gradually going up the tree until you reach the top).
- (4) After the tree has been built, place the smaller 9-inch and/or mini shapes into the gaps and secure them to larger balloons using adhesive tape.

***ADHESIVE TAPE RECOMMENDATIONS** for best results affixing balloons to each other or to flat wall surfaces:

Joe's Sticky Stuff A pressure-sensitive adhesive tape recommended by balloon professionals.

3M Command Products Perfect for hanging products from ceiling or walls using hooks or strips.

what you'll need

air inflator or hand pump

adhesive tape*

twist ties
(the kind used on bread bags, etc.)

balloons, etc.
